PROFESSIONAL CERTIFICATE

FESTO

MUHAMMAD IRFAN FAHMI BIN SAMSUL KAMAR

Completed the Festo Didactic Course on

Industrial Automation with AI in Manufacturing

from 14th to 16th July 2026

at **Selangor Technical Skills Development Centre, Shah Alam (STDCx)**

Having demonstrated mastery of the course's competency-based training outcomes,

- Understand the fundamentals of AI and its relevance in manufacturing.
- Understand the principles, components, operation, symbols, signal flow, and safety of basic pneumatic and electro-pneumatic systems.
- Identify key AI applications such as predictive maintenance, quality control, and energy optimization.
- Connect to production machine controllers and extract operational data.
- Collect, record and prepare data for AI model training
- Develop and train basic AI models using manufacturing data.
- Apply trained AI models to practical manufacturing scenarios.
- Gain confidence in implementing AI-enabled improvements on the production floor.
